The First Thing That Ladies Forget. The English writer Pope declared that women had no decided character, because they were too flighty to retain the same impression for any length of time. They are dark or fair, he adds; that is

the only way in which to classify them. Saphir used to say, "The first thing women know is how beautiful they are; the first thing they learn is how strong they are; the first thing they are taught has notified them that he intends to by experience is how weak they are, and make them pay a year's salary—work the first thing they forget is how old they are.

In his journeyings to Courland Prince Bismarck managed to pick up one or easien terrified a couple of ladies nearly out of their wits by an unexpected display of his acquaintance with their native language. He was sitting at a table d'hote in Frankfort opposite to two young ladies who were carrying on an animated conversation. They

laughed very frequently, and appeared to be criticising the company. From sundry indications Bismarck gathered that he was singled out above the rest as an object of ridicule. He knew sufficient to convince himself that they were talking in Lithuanian. The ladies quite naturally supposed themselves perfectly safe in speaking a barbaric dialect which "nobody would understand," and enjoyed the fun immensely. Meantime Bismarck whispered to a friend who was sitting next to him:

"When you hear me speak a few words in a foreign language, please hand me a key."

At dessert, when the merriment of the oung ladies was at its height, they heard, to their great consternation, the gentleman opposite calmly say to his

## HER SECRET.

Wonderful Complexion Which No One Could Explain.

A lady well known in our social circles has for years been at once the en-vy and admiration of all the ladice hereabouts, on account of the wonder-ful preservation of her health and

ful preservation of her health and beauty, and particularly because of her clear and dazzling complexion.

She has been many times urged by her acquaintances and friends to disclose the secret of her marvellously youthful appearance. Last evening she grew confidential to a little knot of friends among whom the writer of friends, among whom the writer was present, and her secret is now a secret no longer.
"Why, it is really no secret at all,"

she said. "A perfect complexion de-pends upon just two things, strong nerves and a good digestion. "Most women are excessively ner-vous, weak and languid, and as a re-

vous, weak and languid, and as a result their complexions are sallow and their faces pinched, drawn and wrinkled. Female difficulties always aggravate the trouble. Few women have perfect digestion. Now, obviously, if women wish sound health and good complexions they must get their nerves strong, their digestion good and have no female weakness. Disorders of the stomach and liver, with the consequent clogging of the system, is very trying to the complexion. The best thing in the world to overcome these difficulties is Dr. Green's Nervura blood and nerve remedy, for it is a wonderful strengthener of weak nerves and gives a vigorous appetite and perfect diges. a vigorous appetite and perfect diges-tion. An amusing story is told of old Dr. Emmons, a clergyman who was equally famed for the extreme nestness of his person and for his carelessness in regard to his "establisment."

He started one day to "exchange" with a brother whose reputation was, so to speak, the complement of his own. The two divines met on the road, about half way, and stopped to indulge in a fra-ternal chat. Dr. Emmons' horse looked as if he had never known the touch of a currycomb; the dust of bygone days whitened his old chaise, and several seedy haystalks dangled conspicuously

from the top and sides. The old minister himself, however, faultlessly neat from head to foot, was a shining figure in the dingy equipage.

Not a single bair lay "agee" in the glistening coat of the other minister's steed, and the sunlight glistened on the polished cover and wheels of his chaise,

but his own person and dress had been neglected. In the language of today he would be described as "seedy." Unaware of this fact, he gazed at Dr. Emmons' turnout with increasing disapproval. As he was about to drive on he

fired this parting shot at his friend: "Brother Emmons, I should think you would be ashamed of your horse." "And I, my dear brother," was the quick response of Dr. Emmons, "should almost think your horse would be

ashamed of you! After which interchange of shots the two old friends parted in perfect good humor.—Youth's Companion.
